RE: Expiration of ML 49448-MP

Gentlemen:

Please be advised that the above numbered Mineral Materials Permit upon the state trust lands mineral estate in SW4NE4 Section 17, T20S, R2E, SLB&M did expire on October 31, 2009. The permittee no longer has rights to remove building stone, aggregates or other mineral substances from the permitted lands. Mined land disturbances for which the permittee is responsible lands must be reclaimed in accordance with your mining permit issued by the Division of Oil, Gas & Mining.

You may enter the mineral estate of the expired permit, at your own liability and risk, to perform reclamation only as directed by the Division of Oil, Gas & Mining. Please also coordinate your entry with the owner of the surface estate. Any further removal of building stones, aggregates or other mineral substances from the permit lands is not authorized, and would be a trespass violation without the issuance of a new valid Mineral Materials Permit by the Trust Lands Administration.

Please immediately submit a final statement of production to the Trust Lands Administration for any unreported building stone, aggregates or other mineral removed from the lands within the expired permit. Also, please submit payment for any outstanding royalties accruing to the permit.

Sincerely,

John T. Blake
Trust Land Minerals Specialist
